

ClientRadar User Guide

Find freelance clients while you sleep. A complete guide to getting started and winning more projects.

1. Getting Started

Step 1 Create your account

Go to digvera.com/clientradar and click Start Free. Enter your email address — you will receive a 6-digit OTP code. Enter it to verify your account. No password required.

■ *Check your spam folder if the OTP does not arrive within 60 seconds.*

Step 2 Complete your profile

After login, go to Profile Setup and enter your skills, preferred budget range, and the types of projects you are looking for. This is what ClientRadar uses to score your matches.

Step 3 Browse your matched projects

Head to My Matches in the dashboard. ClientRadar scans 7 platforms daily and surfaces the top projects that match your skills and budget. Each project has an AI match score.

Step 4 Generate a proposal

Click Generate Proposal on any matched project. The AI reads the job description and writes a personalized proposal you can send to the client.

■ *Pro feature — upgrade to unlock unlimited proposals.*

2. Your Dashboard

■ Projects Feed

The main feed shows all newly scraped projects from the last 24 hours. Use the filter bar to narrow down by platform, budget, or category. Projects marked with a fire icon were posted less than 6 hours ago.

■ My Projects

Projects you have saved or applied to appear here. Add notes, change status (Applied, In Progress, Won), and archive them when done.

■ Radar Search

Search across all scraped projects using keywords, platform filters, and budget ranges. Results are sorted by relevance and recency.

■ Archived Projects

Projects you have archived are stored here for reference. Archiving keeps your active list clean without losing history.

3. Key Features

Multi-Platform Scraping [Free]

Automatically scans RemoteOK, Freelancer.com, WeWorkRemotely, Jobicy, and more every day.

AI Match Score [Free]

Each project gets a score (0-100) based on how well it aligns with your skills, budget, and preferences.

AI Proposal Generator [Pro]

One-click proposal generation powered by Claude AI, personalized to each job description.

Project Management [Free]

Save, track, and manage all your freelance opportunities in one place with status labels and notes.

Daily Updates [Free]

Database refreshes daily — you always see the freshest opportunities first.

Radar Search [Free]

Full-text keyword search across the entire scraped database with budget and platform filters.

4. Free vs Pro

Feature	Free	Pro — \$29/mo
Project feed access	✓	✓
Daily scraped projects	✓	✓
AI match scores	✓	✓
Radar Search	✓	✓
Projects per day	20 leads	Unlimited
AI Proposal Generator	—	✓ Unlimited
Priority new projects	—	✓

Cancel anytime

Billing is handled securely via Lemon Squeezy. Cancel anytime from your account settings.

5. AI Proposal Generator

Step 1 Find a project you like

Browse the Projects feed or use Radar Search and click on any project to view its full details.

Step 2 Click Generate Proposal

Hit the Generate Proposal button. The AI reads the job description and your profile to write a tailored proposal in seconds.

Step 3 Review and customize

Read through the generated proposal. Copy it directly or make small edits before submitting on the platform.

■ *Add a specific detail about the client's project to make your proposal stand out even more.*

Step 4 Submit on the platform

Click the original project link and paste your proposal. Each platform has its own application process.

6. Pro Tips

■ Check early

New projects are scraped overnight. Check your dashboard first thing in the morning to be among the first to apply.

■ Fill your profile fully

A detailed skill list and budget range dramatically improves your match scores.

■ Prioritize hot leads

Projects marked with a fire icon are less than 6 hours old — competition is lowest on fresh listings.

■ Save interesting ones

Even if not ready to apply yet, save projects to My Projects so you don't lose track.

■ Edit AI proposals

Always add a personal sentence or two — clients notice the difference.

■ Archive closed leads

Once a project is filled or you have moved on, archive it to keep your active list clean.

7. FAQ

How often are new projects added?

The scraper runs once per day. New listings from the last 24-48 hours appear in your feed by the following morning.

Which platforms does ClientRadar scan?

Currently: RemoteOK, Freelancer.com, WeWorkRemotely, Jobicy, and additional sources. More platforms are added based on user feedback.

How is the AI match score calculated?

Based on keyword overlap with your skills, budget alignment, and category match. Scores range from 0-100. Anything above 70 is generally a good fit.

Can I cancel my Pro subscription anytime?

Yes. Cancel from account settings anytime. Pro access continues until end of current billing period. No refunds for partial months.

Why is my OTP not arriving?

Check your spam folder. OTP emails come from ClientRadar via SendGrid. If still missing after 2 minutes, request a new code on the login page.

Does ClientRadar apply to jobs automatically?

No. ClientRadar finds, scores, and generates proposals — but you submit applications yourself on each platform. You are always in control.

8. Contact & Support

Need help? Email us at support@digvera.com

We typically respond within 24 hours.
